

## **LEQEMBI (lecanemab-irmb) 100mg/mL Injection for Intravenous Use** **Vial Replacement Credit Program**

Eisai maintains a limited product replacement credit program for LEQEMBI IV which provides credit for single-dose replacement product for four (4) specified qualifying events resulting in unintended product spoilage:

- Product was reconstituted and patient missed appointment, refused product, or patient expired.
- Product is dropped, mishandled or opened incorrectly.
- Product incurred a reconstitution or admixture error.
- Product endured extreme temperature exposure.

Eligibility to receive replacement product credit is limited to one (1) incident per provider site, per calendar year, and a provider site is eligible to receive no more than five (5) vials of LEQEMBI IV per incident.

The LEQEMBI IV Vial Replacement Credit Program applies to single-dose claims. The only exception to this limitation is if the spoilage occurs due to a refrigeration failure or natural disaster. In such a circumstance, a request may be made for no more than five (5) vials of LEQEMBI IV regardless of how many vials were spoiled. Customers are not eligible to receive credit based on a single-dose request and a multi-unit request in the same calendar year.

Requests must be received within one hundred eighty (180) days of the incident. All requests must be submitted using the LEQEMBI IV Vial Replacement Credit Request Form which may be accessed by contacting Eisai Patient Support:

Phone: 833-453-7362

Monday–Friday: 8 AM-8 PM ET

Completed forms should be submitted to Eisai Patient Support:

Fax: 833-770-7017.
