\$1,008.00 per 30 count bottle
\$1,008.00 per 30 count bottle
\$1,302.00 per 340 mL bottle

Generic Drugs in Same Therapeutic Class**

none

The price patients will pay to acquire the marketed drug is often different than the WAC prices listed, and most patients do not pay WAC. How much a patient will pay will depend on many factors, including the patient's insurance coverage. To find out the exact cost of their prescriptions, patients should contact their health insurance company or preferred pharmacy.

**Wholesale Acquisition Cost (WAC) as published by FDB represents the manufacturer's published catalog or list price for a drug product to wholesalers as reported to FDB by the manufacturer. WAC does not represent actual transaction prices and does not include prompt pay or other discounts, rebates or reductions in price. FDB does not perform any independent investigation or analysis of actual transaction prices for purposes of reporting WAC. FDB relies on manufacturers to report or otherwise make available the values for the WAC.*

<https://www.fdbhealth.com/drug-pricing-policy>

***Colorado law requires manufacturers to provide the names of generic prescription drugs from the same "therapeutic class" as the marketed drug. Colorado defines "therapeutic class" as "a group of similar drugs that have the same or similar mechanisms of action and are used to treat a specific condition." Based on Eisai's interpretation of that definition, the listed generic prescription drugs are in the same "therapeutic class" as BANZEL. This list does not imply that the products are interchangeable or have the same efficacy or safety. Please refer to each product's FDA-approved label and indication for further information. There are currently no generic prescription drugs in the same "therapeutic class" as FYCOMPA.*
